## SUMMARY

Full-stack developer with 3 years of professional experience, specializing in React and Node.js. Skilled in building scalable, high-performance applications with expertise in cloud deployment using AWS and containerization with Docker. Strong problem-solving mindset with a focus on delivering efficient, reliable, and user-centric solutions.

## WORK EXPERIENCE

### Full Stack Developer

Feb 2023 – Oct 2023

*Whitecrow Research pvt limited, Mumbai*

- Designed and deployed mission-critical features in Webtree ATS, covering both frontend and backend components to enhance recruitment workflows
- Collaborated with cross-functional teams** such as the design team, the product team and the testing team to ship new features
- Led **critical bug resolution** initiatives to optimize system functionality and improve stability
- Developed webhook into the company's product, enhancing real-time candidate data synchronization between platforms which **increased an overall 30% number of candidate data**
- Configured CI/CD pipelines for applications, ensuring seamless code integration and deployment

### Larsen & Toubro Infotech, Pune

Oct 2020 – Nov 2022

*Software Engineer (Aug 2021 – Nov 2022)*

*Graduate Engineering Trainee (Oct 2020 – Aug 2021)*

- Implemented server-side APIs and business logic to support scalable application features
- Built responsive, user-friendly interfaces with React.js, ensuring **cross-browser and cross-device compatibility**.
- Reduced **UI defects by 40%** and improved release stability by writing unit and integration tests with React Testing Library
- Diagnosed and resolved production issues, **improving system stability and minimizing downtime**
- Collaborated with offshore teams to evaluate feature feasibility and align development efforts

## OTHER WORK EXPERIENCE

### Front of House Sales Assistant

June 2025 – Present

*Liverpool Football Club, Liverpool*

Managed front-of-house operations at Liverpool FCs Tour Museum, assisting and directing up to **2000 visitors per day** during peak periods while ensuring smooth service and a positive guest experience.

## SKILLS

**Programming Languages:** C++, Python, JavaScript, TypeScript, C

**Frameworks & Libraries:** React.js, Next.js, Angular, Express.js, Redux, Jest

**Databases & Cloud:** MySQL, MongoDB, AWS
